WOODS

by METRICA

The new officescape by Metrica

Woods nasce dalla riflessione sui nuovi modi di lavorare e sui mutamenti dei luoghi ad esso deputati, offrendo una serie di moduli che vanno dalla postazione "focus" a quella condivisa, dalle aree meeting a quelle collaborative.

Si compone di ampi tavoli direzionali e meeting, di scrivanie operative e di postazioni regolabili in altezza, una collezione che passa dall'operativo al direzionale con una semplice alternanza tra piani e gambe. La gamba in legno massello è caratterizzata da un disegno inclinato che conferisce al tavolo un aspetto sobrio e al tempo stesso sofisticato.

Woods was the fruit of reflections on new ways of working and on how the workplace is changing. It offers a range of modules, from the "focus" station to a shared one, and from meeting areas to collaboration spaces.

It includes large executive and meeting tables, office desks and adjustable-height workstations, a collection that covers everything from operative to executive simply by changing the combination of tops and legs. The solid wood legs feature a distinctive sloped design that gives the table a simple yet sophisticated look.
